Order specification: System - Pole set no. - Length without finials (rail incl. return pulley) - Pulley operation left or right hand side - Curtain stack left, right or left & right

As a standard we assemble pulley operation on the left-hand side. Please specify whenever an assembly on the right-hand side will be required.

All Pole sets with overlap and without cord weight (for more information about cord weights see page 13) - kindly send in a special request for special designs and/or other accessories.

440 cm or longer: 4 wall brackets recommended.

Notes for orders and shipments

1. All business transactions are subject to our General Terms and Conditions of Sale and Delivery.
2. All prices are stated in EUR including VAT per set, per piece or per metre.
3. All specified prices are non-binding recommended prices.
4. The ordered length (= rail length), as specified in cm, will be delivered. The next size up on the price table will be invoiced for any intermediate length.
5. All specified dimensions are approximate.
6. You are kindly requested to ensure that very small orders with a net order value that falls below of EUR 250 are avoided because of their high processing cost. Very small orders that cannot be avoided will be delivered with the next shipment or invoiced with a EUR 15 mark-up for small volume purchases, in case an immediate shipment has been requested. For packing units of a length that exceeds 260 cm we reserve the right to request an additional mark-up for overlength.
7. We invoice a surcharge of 25% on neutral and/or direct shipments to your customers / the final customer.
8. For any installation of brass articles in rooms having a high atmospheric humidity care should be taken to opt for products with a higher corrosion resistance preferably for articles with chromium or nickel plated surface.
9. Different materials (batches) are combined during the manufacturing process. This may lead to colour variations on any kind of surface. No claims for compensation will be accepted.
10. The use of an additional bracket for a complete curtain set has always been defined in cooperation with our customers. It is a non-binding recommendation. Under certain conditions, e.g. when using heavy curtain materials or brackets with a longer distance from the wall, additional brackets should be used for shorter tube lengths / rail lengths. In particular for brackets with multiple gliding channels (double, combined and/or multiple) make sure to check and consider the weight of the complete decoration before you install it. We will accept no warranty claims.
11. We assume no liability for any damage resulting from an improper installation.
12. Make sure to check our order acknowledgements for correctness of your order specifications, as we will accept no claims for compensation in the case of a delivery, which might not be as stipulated.
13. We expressly point to the fact that any merchandise delivered by us must be checked for completeness and correctness when received, and prior to an onward shipment or further handling. Queries must be notified to us in writing without undue delay, but no later than within one week from receiving the merchandise.
14. Return shipments must be coordinated with us before shipping the goods back. All goods must be free of damage and in the original packaging. We are unable to take back any tube and/or rail cut-to-size and item made to order. We invoice a return-to-warehouse-charge of a minimum of 30% on all return shipments, which are not due to our fault. By principle, we will accept no articles that have been delivered more than 12 months ago.
15. We reserve the right to deviate from illustrations, descriptions and dimensions, to technical changes, progressive engineering, improvements plus the correction of printing errors and misconception at any time.
16. We expressly reserve the right to adjust our prices in the case of unforeseen wage increases and material price increases.
17. Customer has expressly acknowledged our terms and conditions when we accept his order.
